CSS / SASS / LESS	PHP	SCRUM / Agile	Ionic 2+	Cordova
HTML	Vagrant	Github		
Gulp / Webpack	Nginx / Apache	Jira / Bitbucket	Reactive State Management	
Jasmine / Protractor	Lua / OpenResty	Docker with CI	NGXS / NGRX	

#Professional Experience

Chepri, LLC / Lead Angular Developer

April 2018 - Current | Columbus

↳ Developed large scale, front-end online ordering experience platforms with Angular for some of the nation's top restaurant brands. Online experiences that I was a large contributor to include; Modern Market, Freebirds World Burritos, BurgerFi, and Port of Subs. These new online experiences have helped these clients see increased checkout speeds and larger average orders.

↳ Worked with Angular 4+ and Ionic 3/4, Angular Reactive state management frameworks NGRX and NGXS, similar to React Redux, Ruby on Rails, Nginx and Apache2 servers, Node.js with Angular Universal for server side rendering, server side lua scripting with OpenResty.

↳ Consumed multiple 3rd party Point of Sale/Loyalty REST API's including Olo, Fishbowl, Paytronix, Punchh, LevelUp, and Qu Beyond.

↳ Modified the Port of Subs online ordering system to be used with in-store kiosks. This included integration with the Lilitab kiosk and a credit card swiping device.

↳ Setup Nginx and Express.js to proxy pass API keys and Authorization headers to allow the front-end sites to retrieve data without exposing confidential information to the end user.

↳ Utilized continuous integration using docker for streamlined deployment.

↳ Each restaurant project was integrated with a headless CMS to dynamically pull fresh content allowing clients to update their content with a friendly user interface when needed.

Independent Ionic Mobile App Developer

2016 - 2018 | Columbus, Ohio

↳ Designed and programmed full stack apps with Angular and Ionic that I self published on the iOS and Android platforms.

↳ Modified Cordova plugins to match the needs of each app.

↳ **Accolades**:

   • Sleep Orbit - Featured on Apple's App Store, "New Apps We Love" (Global) May 2017
   • Sleep Orbit - Featured on Apple's App Store, "App of the Day" (Japan) December 2017
   • Sleep Orbit - 2+ million downloads (iOS + Android)

#Education

Franklin University / Bachelor of Science – Web Development

2012 - 2016 : Columbus
